

Seaside Dental

Cyber-First IT That Keeps a Modern Dental Practice Running Securely and Seamlessly

About Seaside Dental

Located in Old Saybrook, Connecticut, **Seaside Dental** is a general dentistry practice serving a loyal and growing patient base. Known for its modern approach to care, the practice has invested in digital workflows, patient convenience tools, and paperless processes. But behind the scenes, it all relies on secure, reliable IT infrastructure—designed and managed by Logically.

For more than 15 years, Logically has supported Seaside Dental with a **cyber-first managed services approach** that ensures operational uptime, regulatory compliance, and digital resilience.

Why It Matters

In today's dental environment, technology touches everything—from digital imaging to e-payments to patient scheduling. Seaside Dental's ability to deliver excellent care depends on **system availability, data protection, and security assurance**.

With HIPAA regulations, a mobile workforce, and growing cyber threats, the practice needs more than just an IT provider—it needs a partner who ensures everything works, and everything is protected.

We've modernized our systems to go paperless, accept electronic payments, and serve patients more efficiently—and Logically has been there through it all. We're never offline.

Deborah Lamboley,
Practice Manager

The Challenge

When the COVID-19 pandemic forced a temporary closure, Seaside Dental's ability to reopen and serve patients safely depended on one thing: the **availability and reliability of its IT systems**. The team needed remote access to critical files, secure connections, and a support team that could keep everything running—fast.

With HIPAA obligations and patient trust on the line, downtime was not an option.

The Solution

Logically provided a fully managed, cyber-first IT solution tailored to the unique needs of a dental practice:

24/7 monitoring and support, ensuring systems remain available and secure—even during emergencies

Strategic modernization, helping Seaside implement e-signature tools, electronic payments, and patient-facing tablets

HIPAA-aligned compliance support, including patching, endpoint protection, and access controls

Ongoing infrastructure optimization, ensuring reliability for imaging, scheduling, billing, and communications platforms

Business continuity planning, enabling seamless recovery and uptime assurance

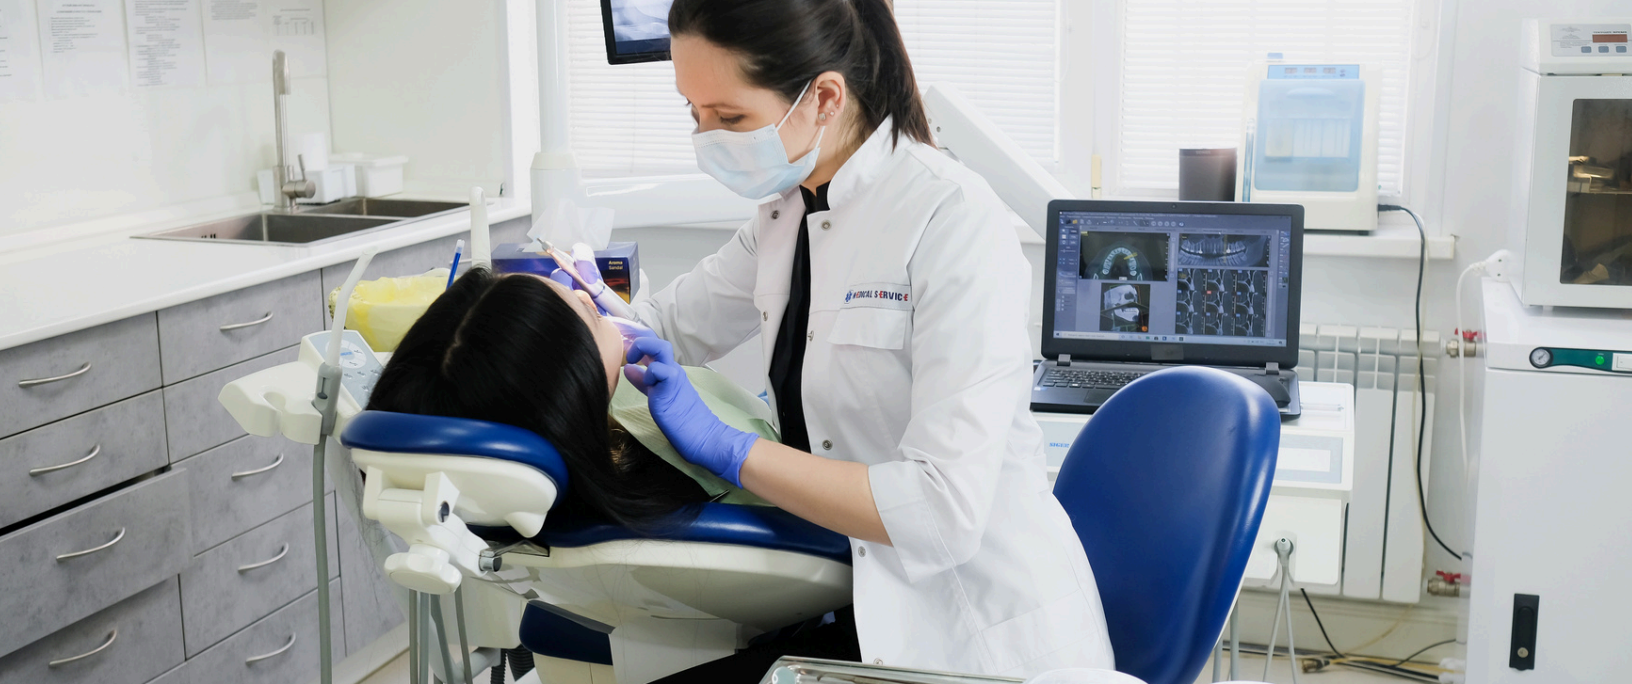

Secure remote access to key systems during the pandemic and beyond

I never worry about security or compliance. Logically has it covered, and I know we're in good hands.

Deborah Lamboley

Strategic Impact

- ✔ Zero downtime across core business systems—even during pandemic closures
- ✔ HIPAA-compliant infrastructure to support evolving regulatory needs
- ✔ Digital transformation through paperless workflows and modern patient engagement tools
- ✔ Resilient operations powered by proactive security and remote-ready support
- ✔ Long-term trust built through consistent, responsive, and expert service

I am comforted by knowing that the practice never sees any downtime—and if we did, Logically would be on it. They're there for us 24/7.

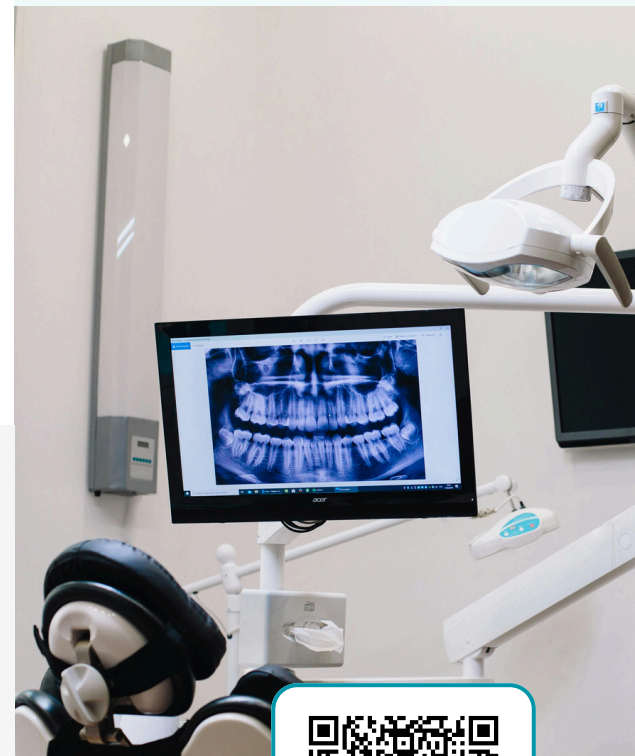

Deborah Lamboley

Partnering for Resilient, Future-Ready Care

In healthcare, secure, reliable systems are essential for protecting patient data and ensuring uninterrupted care. With Logically's expertise and commitment to operational excellence, providers can strengthen security, streamline workflows, and stay ahead of evolving compliance demands. Let's explore how we can help you deliver safer, more efficient care.

Future Ready

Seaside Dental continues to grow its patient base and expand its digital footprint. With Logically as a strategic IT and cybersecurity partner, the practice is well-equipped to handle future regulations, emerging threats, and next-generation care technology—with confidence.
