

Logically + Huntress

Protect What Matters

Cybercriminals don't take breaks—and your security stack can't depend on automation alone. Mid-market organizations face growing attack surfaces, regulatory scrutiny, and SOC staffing limitations that make 24/7 coverage feel out of reach.

Huntress, delivered by Logically, changes the game.

With always-on threat detection, real-time containment, and hands-on human expertise, you gain peace of mind without the overhead. Whether standalone or integrated with **SecureCare**, Huntress scales to your needs and responds with urgency—so you can protect what matters without distraction.

WHAT YOU'LL GAIN

Human-Backed Protection, Purpose-Built for Mid-Market IT

- ✓ **Managed Endpoint Detection & Response (EDR)**
Stops advanced threats that bypass antivirus and embed footholds.
- ✓ **24/7 Human-Led SOC**
Real analysts triage and respond around the clock.
- ✓ **Assisted & Manual Remediation**
Combines automation with guided host isolation and deep forensics.
- ✓ **Post-Breach Deployability**
Can be deployed during an active incident to contain and recover faster.

WHO IT'S FOR

Mid-market businesses without full-time security teams

Compliance-bound industries needing audit-ready defense

IT leaders seeking low-friction, high-impact protection

SecureCare customers adding managed endpoint protection

WHAT'S INCLUDED

24/7 managed SOC with hands-on threat hunters

Modular coverage across EDR

Host isolation and credential monitoring

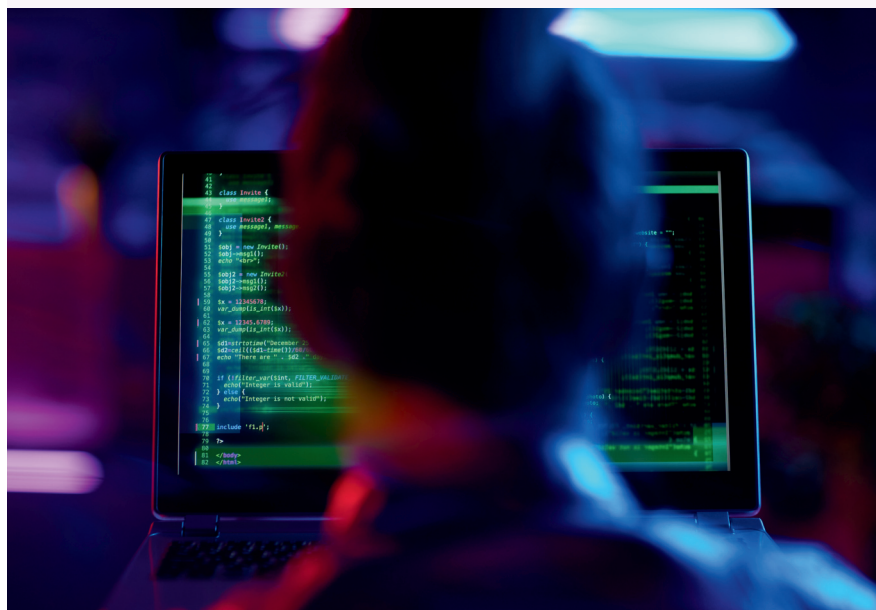

Automated and human-led remediation support

Executive reporting and full incident transparency

Seamless integrations with Microsoft Defender and SecureCare
