

# LOGICALLY HOSTING SOLUTIONS

Private, managed hosting built for performance, resilience, compliance, and predictable cost control.

## EXECUTIVE SNAPSHOT

### What It Is

A managed private hosting platform built on high availability infrastructure with nationwide data center options and full lifecycle support.

### What It Replaces

Unpredictable public cloud spend, self-managed infrastructure, fragmented DR strategies, and tiered support models.

### What You Gain

99.99% uptime, transparent pricing, enterprise-grade security, geographically dispersed disaster recovery, and 24/7 expert human support.

## THE CHALLENGE

Mid-market organizations face growing infrastructure demands with limited internal resources.

Public cloud platforms often introduce:

Complex self-service management models

Unpredictable usage-based billing

Hidden fees

Over-provisioning

Tiered support structures

Responsibility for configuring security and compliance tools

As infrastructure grows, so do risks around uptime, cost control, and disaster recovery readiness.

## THE IMPACT IF NOTHING CHANGES

Without a managed, resilient hosting strategy:

Unexpected cloud cost overruns

Operational disruption during outages

Inconsistent disaster recovery capabilities

Increased compliance exposure

IT teams diverted from strategic initiatives

Limited visibility and support when issues arise

Infrastructure complexity increases. Accountability decreases.

## THE SOLUTION: LOGICALLY HOSTING SOLUTIONS

A managed, customer-centric hosting platform designed to simplify infrastructure while maximizing reliability, security, and cost transparency.

Built on high availability hyperconverged Nutanix clusters, Logically Hosting delivers:

99.99% uptime

Personalized support

Dedicated private infrastructure

Scalable resources aligned to business needs

Transparent, predictable pricing

## WHO IT'S FOR

Organizations seeking predictable hosting costs

IT leaders requiring enterprise-grade security without managing it internally

Healthcare, regulated, and compliance-driven industries

Growing businesses that need scalable infrastructure without ecosystem complexity

Companies looking for a genuine hosting partner rather than a self-service platform

Unlike standardized public cloud ecosystems, Logically provides a managed experience tailored to your specific requirements.

## WHAT YOU GET

### High Availability Infrastructure

- Hyperconverged Nutanix clusters
- Exceptional performance and resilience
- Site-level redundancy with geographical failover

### Disaster Recovery and Data Protection

- All hosted client data replicated to a secondary Logically data center
- Geographically dispersed disaster recovery capabilities
- Immutable backups
- Encryption at rest
- Business continuity in the event of a local outage

### Security and Compliance

- Annually SOC2 Type 2 Certified for security and availability
- All data center partners SOC2 certified
- Enterprise-grade security tailored to your industry
- Proactive monitoring
- Custom defenses
- Compliance support including HIPAA and GDPR

### Scalable Resource Model

- Flexible, scalable solutions
- Adaptable infrastructure as your business grows
- Avoid over-provisioning
- Pay for what you use without bloated subscriptions

### Nationwide Data Center Options

- Raleigh, NC
- Suwanee, GA
- Reno, NV

### Expert Support

- 24/7 expert human support
- Dedicated team that understands your business
- No automated responses
- No tiered ticket systems
- Hands-on engineers included

## ADOPTION AND DEPLOYMENT

Customized hosting experience

Managed configuration and ongoing optimization

Plan tailored precisely to your requirements

Transparent pricing without hidden or unexpected usage-based charges

Infrastructure simplified. Managed end-to-end.

## WHY CHOOSE PRIVATE HOSTING OVER PUBLIC CLOUD

Public cloud providers such as AWS, Azure, and Google Cloud focus on mass scalability.

Logically Hosting provides:

Dedicated resources

Enhanced privacy

Cost predictability

Managed compliance

Personalized partnership

A hosting solution designed for your success, not a platform to navigate alone.

**Empower Your Business with Reliable and Scalable Hosting.**
