

SecureCare

Threat Detection, Breach Prevention, and Compliance-Aligned Reporting

Mid-sized businesses are now prime targets for cyberattacks—but few have the time, tools, or teams to maintain enterprise-grade defense. Most rely on general MSP support for reactive fixes, leaving high-value assets exposed. SecureCare bridges this security gap with 24/7 managed protection that attaches seamlessly to LogicCare and LogicBase IT services.

SecureCare combines top-tier threat detection, breach prevention, and compliance-aligned reporting into one cohesive offering—helping mid-market IT leaders reduce risk and downtime without hiring an in-house security team.

- 60% of small and mid-size companies go out of business within 6 months of a cyberattack (Source: Cybercrime Magazine)
- Cyber insurance claims are increasingly denied without layered defense and proof of response efforts (Source: Advisen Cyber Claims Report)

WHAT YOU'LL GAIN

Capability	Benefit
Endpoint Detection & Response (EDR)	Stop malware, ransomware, and fileless attacks across all user devices
24/7 Security Operations Center (SOC)	Get real-time monitoring, alert triage, and active response around the clock
Vulnerability Scanning (Internal & External)	Identify and prioritize remediation of high-risk weaknesses
Security Awareness Training & Phishing	Build a security-first culture and reduce human error
SaaS Application Monitoring	Detect suspicious behavior in Microsoft 365, Google, Salesforce, and more
SIEM with Correlation & Reporting	Gain centralized visibility and compliance-friendly logs and alerts
Domain Breach Monitoring	Detect leaked credentials and exposed data tied to your company domain

WHO IT'S FOR

Mid-market businesses without a dedicated cybersecurity team

Organizations layering security on top of LogicCare or LogicBase

Compliance-regulated industries (HIPAA, PCI, FINRA, GLBA)

CISOs, IT Directors, and Operations leaders needing security without complexity

WHAT'S INCLUDED

- ✔ SentinelOne EDR
- ✔ SIEM with SentryXDR for event correlation, alerting, and compliance logs
- ✔ 24/7 SOC monitoring and escalation from trained security analysts
- ✔ Huntress MDR
- ✔ Annual external vulnerability scans
- ✔ KnowBe4 training and phishing simulation
- ✔ SaaSAlerts for Microsoft 365, Salesforce, and other platforms
- ✔ DarkWebID breach detection for compromised credentials

SecureCare is available as a stand-alone security solution or as an add-on to existing Managed IT services.

Two Additional Log or Flow Streams		✔	✔
Compromised User Credentials / Insider Threat Identification		✔	✔
Suspicious User Account Creation Identification		✔	✔
Suspicious Lateral Movement Detection		✔	✔
Active Directory Auto-remediation		✔	✔
Unlimited Log or Flow Streams			✔
360-Degree View of the Network			✔
Endpoint Log and Flow Ingestion			✔

USE CASE SNAPSHOT

Proactive Defense for a Growing Healthcare Provider

A multi-site behavioral health organization relied on LogicCare for day-to-day IT but needed to meet HIPAA audit requirements after a partner breach.

Logically attached SecureCare to their existing environment, deploying endpoint monitoring and vulnerability scanning within 72 hours. Just days later, the SOC flagged anomalous outbound traffic from a front desk workstation. Analysts discovered a backdoor beaconing to an IP in Eastern Europe.

- ✔ Threat contained within 15 minutes—no PHI compromised
- ✔ Passed third-party HIPAA audit 3 weeks ahead of schedule
- ✔ Avoided \$175K in potential breach-related penalties and PR fallout

Your infrastructure should work as hard as you do.
